## Web Page Evaluation

Overall function of the site	The site is geared towards elementary children and is age appropriate. Users are able to find information since there are headings and various categories that make navigation easy. Topics are diverse, covering multiple academic subject areas and fun stuff as well. Graphics and pictures are appropriate
Site organization	The site is appropriately spaced. It has pictures to engage the viewer. It is not just text. There are several categories for easy differentiation such as online references, local newspapers, science and math websites, current events, writing sites, fun stuff, citation links and author pages. There are a few little icons and two digital pictures of the students and library. Most interestingly, the school library page has a link to the public library page. I have never seen that done before and I think that is a good idea.
Screen Shot + URL	<a href="http://www.pasadenaisd.org/redbluff/library.htm">http://www.pasadenaisd.org/redbluff/library.htm</a>
Use of font and color	The font is basic arial and easy to read. The colors are red and purple against a white background. Lettering is in black, white and blue depending on the contrasting background.
Accommodations for the visually impaired	There are no accommodations for the visually impaired or any other disabled students, for that matter.

## Red Bluff Elementary Library

Ms. Ann Rice  
Library Media Specialist & Webmaster  
arice@pasadenaisd.org

### About our Library ~

The Red Bluff Elementary Library was remodeled during the building's first renovation in April, 1992. The [mission](#) of the library program is to provide students and staff with the materials and skills needed to be good users of ideas and information.

The log cabin is a favorite place for students to relax and read a library book, and the kiva makes a great place to sit and listen to a story.

Roadrunner Reference Room

[Merriam-Webster

## Writing

[Create Your Scenario!](#) - Write your own play.

[WebGrammar](#) - This has great writing advice and tips. Excellent site!

## How to cite a source for a written research paper:

This website is a lifesaver! Simply click on the type of source (book, magazine article, etc.), then enter the author's name, title, publisher, etc., and the computer will put the information into the correct citation format. Yippee!
